Dear Eversource Agents,

Pertaining to the reasons below, I prohibit and deny consent of any installation, monitoring, eavesdropping, surveillance and radiation-emitting devices on my property especially in the form of a digital utility meter.

1. They individually identify electrical devices and record when they are operated causing an invasion of privacy.
2. They monitor household activity and occupancy in violation of rights in domestic privacy.
3. They transmit wireless signals that are interceptible by unauthorized parties.
4. No power company or individual agency has consent to conduct surveillance or monitoring or to emit radiation on our property and residence with a digital meter or any device.
5. Those with access to the data can review a permanent history of household activities taken unlawfully without the consent of occupants.
6. Those databases may be shared or fall into the hands of unauthorized law enforcement, private hackers of wireless transmissions of other unidentified parties.
7. Smart meters are, by definition, surveillance devices that violate state wiretapping laws.
8. By intentional transmission or incidental disruption of house current, digital meters emit cancer-causing electromagnetic radiation, which violates laws against public endangerment, assault and bodily harm and many other diseases and illnesses and symptoms.

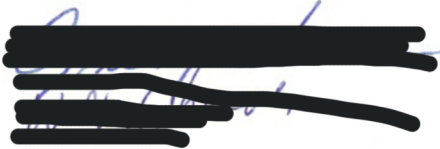

Any attempt to install any such device on this property will constitute trespass, stalking,

wiretapping and assault, all prohibited and punishable by law through criminal and civil actions. All persons, government agencies and private organizations responsible for installing and operating monitoring devices that are considered unlawful will be fully liable for major financial and compliance claims and demands in excess of one million dollars.

This is a legal notice. The liabilities and obligations listed above are true and binding upon all parties upon delivery of this notice. Notice to principal is notice to agent, and notice to agent is notice to principal.

Respectfully,

r
